The OECD is a unique forum where the governments of 30 democracies work together. The Oslo Manual, developed jointly by Eurostat and the OECD, is part of this working paper. It sums up the main findings of an OECD project aiming to revise the current guidance for measuring innovation as proposed in the OECD/Eurostat Oslo Manual.

Project commissioned in part with a view to revising the current guidance for innovation measurement: – Frascati manual (R&D). – Oslo manual (Innovation).

In 2005 a new version of the OSLO Manual was compiled under the auspices of the OECD's NESTI expert group. Experiences of the past years with innovation measurement, as reported in the OECD Oslo Manual (on measuring innovation) and the OECD Frascati Manual (on measuring research and development).

An initial description of the CSIRT. Source: 3rd revision, Oslo Manual, OECD. Innovation is NOT invention. It does NOT require creative effort – adoption of new manufacturing technology.
